

SET 7- Customer Demographics Analysis

7D. Combined Interactive Dashboard

Program:

```
library(plotly)

bar_plot <- ggplotly(
  ggplot(customer_data,
    aes(x=factor(Age), fill=factor(Age))) +
  geom_bar() +
  labs(title="Customer Age Distribution") +
  theme_minimal() +
  theme(legend.position="none"))

gender_data <- data.frame(
  Gender=c("Female","Male"),
  Count=c(2,1))

pie_plot <- plot_ly(
  gender_data,
  labels=~Gender,
  values=~Count,
  type="pie")

dashboard <- subplot(bar_plot, pie_plot, nrows=2)

dashboard
```

Output:
