

20 C. Tableau Dashboard

Aim:

To create an interactive Tableau dashboard combining bar charts to analyze product inventory quantities and categories.

Procedure:

1. Open Tableau and load the Product Inventory dataset.
2. Create a **Bar Chart** showing product-wise quantity available.
3. Create a **Stacked Bar Chart** showing quantity by product category.
4. Create a new **Dashboard**.
5. Drag both charts into the dashboard.
6. Add filters for interactive exploration.
7. Add suitable titles and labels.
8. Save the dashboard.

Output:
